

West separate new-line and tabs

```
// List current selection
```

```
prompt << "\n<SELECTED>";
```

```
int index = 0;
```

```
for (auto const& ta_ptr : model->selected_date_ordered_tagged_amounts) {
```

```
    prompt << "\n\t" << index++ << ". " << ta_ptr;
```

```
}
```

I "west separate" paragraphs, headings etc.
